Allan Savory - Holistic Management

A guide to help us make decisions towards what we want.

Environmental – Social - Financial

Change is inevitable!
**- Can we choose the
change we want?**

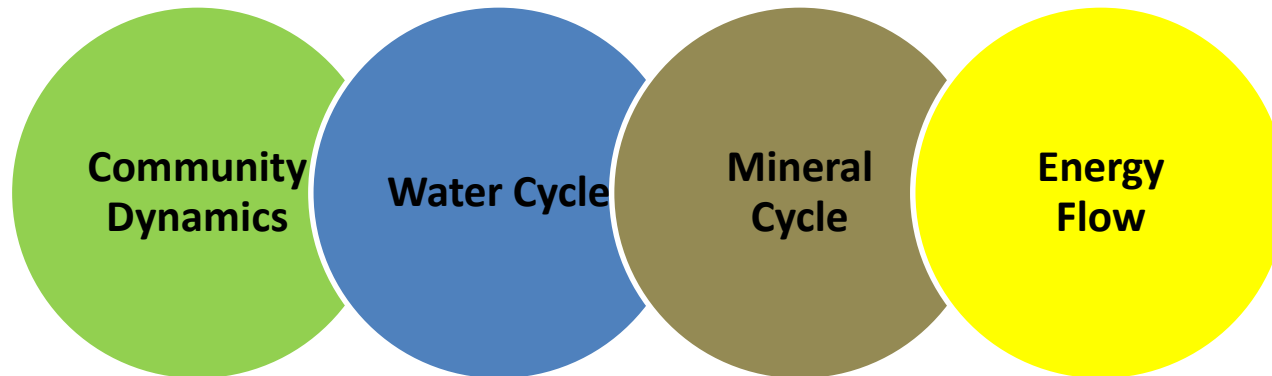

Further Recommendations

- **TED Talk – Alan Savory – *Holistic Management***
- ***Dark Emu* – Bill Pascoe**
- ***The Bush* – Don Watson**

Biodiversity

- The diversity of species within an environment
- The genetic diversity of each of those species
- The mass/volume of each of those species

Ecosystem processes that affect biodiversity:

Living Capping

Capping like a road

High rainfall – system still paralysed

Change is inevitable!

- Can we choose the change we want?**

Making decisions towards increased Biodiversity

High Density Grazing

- Animal stimulation opens capped ground, which allows moisture to reach the soil and start plant growth.

High density stimulation of capped patches.

High density grazing with long rest.

Healthy land – happy people – profitable business
